

	Spray guns	Nozzle kits	Sprayed products	Product benefits and application fields
	SATAjet 20 B Spray gun nozzle 1.0 <i>Réf: JET20BPAT1.0VM</i>	Kits from 0.2 to 1.0	Cocoa butter	- Enables detailed decoration thanks to its precision; - Easy to handle, like a spray gun; - More robust than an airbrush; - Ideal for sculptures, decorations, mold spraying, and precision drawing.
	SATAminijet 4400 HVLP Spray gun nozzle 1.4 SR <i>Réf: MINIJET4400PAT1.4VM</i> SATAminijet 4400 RP Spray gun nozzle 1.2 <i>Réf: MINIJET44001.2PRVM</i>	Kits from 0.3 to 1.4 Kit 1.2 - Without horns Special for half-sphere mold	Cocoa butter / Velvet effect Chocolate coloring Shiny solutions Cocoa butter	- Highly maneuverable due to its small size and light weight; - Fine spray quality; - deal for chocolate decorations, entremets, artistic pieces, and sculptures. - Gradient effect in your half-sphere mold – from very light or even transparent in the center to darker at the edges; - One-shot spraying for time efficiency.
	SATAjet1000 B RP Spray gun nozzle 1.8 <i>Réf : JET1000PASTRY1.8VM</i> <i>Réf : JET1000PASTRY1.8PRVM without horns, increases product output and eases chocolate application.</i> Spray gun nozzle 3.0 HV * <i>Réf : JET1000PASTRY3.0VM</i> 3.0 HV * This nozzle allows for fine application of thick products at low pressure. Spray gun nozzle 5.0 <i>Réf : JET1000PASTRY5.0VM</i>	Kits from 0.8 to 5.0	Cocoa butter Chocolate coloring Velvet effect Coating / Glaze Neutral, fruit, chocolate Pastry egg wash / Jelly Thick glaze / coating	- Very easy to control; - Versatile spray gun; - Allows application of a wide variety of products, from thin to thick, thanks to its different nozzle sizes. - Precise atomization, perfect application; - Saves both time and product. - For thick to very thick products.
	SATAjet 1000 K RP Spray gun nozzle 1.5 <i>Réf : 1132126</i>	Kits from 0.8 to 4.0	Glaze / Coating Cocoa butter / Egg wash	- Continuous production, ideal for large volumes; - Low-pressure gravity spray gun, with very little overspray; 15L tank with optional adjustable heating belt; - Trolley with wheels included for easy mobility.

Important

All these recommendations may vary depending on your specific recipes, the temperature at which you heat the product to be sprayed, and the quality of your air supply system. A high-quality, relatively powerful compressor, equipped with an air outlet and an inner hose diameter of 9 mm, is essential to achieve optimal spraying results. A three-stage filtration air purifier is indispensable to remove all dust, water, rust, and any other particles that may settle on sprayed items intended for consumption.
